NHF & 16 Malaysian Manufacturers' Recruitment Fair Woo Over 300 Malaysian Graduates In Taiwan

KUALA LUMPUR, July 30 (Bernama) -- New Hoong Fatt Holdings Bhd (NHF) and 16 Malaysian manufacturers who joined hands to offer more than 100 job positions at the two-day Malaysia Enterprises Recruitment Fair in Taipei last week, attracted over 300 fresh Malaysian graduates.

The event was organised by the Malaysian Chamber of Commerce and Industry in Taipei (MAYCHAM) and co-hosted by Malaysia Students Association in Taiwan (MSAIT) and TalentCorp.

Vice-Chairman of MAYCHAM and NHF Group Managing Director James K C Lau said many enterprises showed there were a large number of students at the exhibition who met their requirements and many had made interview arrangements for the students.

"One participating exhibitor noted that most students had the impression that Taiwan companies offered higher salaries, which was not true in some cases as there are vacancies in Malaysia which pay higher," he said in a statement today.

In the future, MAYCHAM would organise similar events on an annual basis, preferably in early June to allow more fresh graduates to participate, he said.

This first ever event attracted members of the Federation of Malaysian Manufacturers, Malaysian Plastics Manufacturers Association, Malaysian Automotive Component Parts Manufacturers, Malaysia Steel And Metal Distributors Association, Malaysia Mould & Die Association, Malaysia Water Association and VISTAGE providing both good employment prospects and competitive salaries.

In support of the recruitment drive in Taiwan, TalentCorp has created a virtual platform enabling graduates who were unable to attend the event to view and apply for all available positions.

From July 25 to Aug 11, 2013, interested applicants can visit <http://maychamtw.virtualcareerfair.my> to select from a list of available positions.

The NHF is involved in manufacturing of metal and plastic automotive body replacement parts, tools and dies, moulds and dies; and wholesaling, marketing and trading of motor vehicle parts and accessories in the replacement market currently exports to about 50 countries across the board.
